

Cooperation with Ukrnafta has been carried out since 2018. The company's oilfields are supplied with WellSim controllers and WellSim control stations equipped with integrated VSDs. The NaftaSCADA system has been deployed in the data centers. The total number of wells equipped with WellSim in various configurations is 75.

According to the review from NGDU OkhtirkaNaftoGaz, PAO Ukrnafta:

Reduced number of well workovers

Reduced workload of staff

Reduced vehicle use
